211info Regional Partnership

Training and Professional Development Series

Affordable, high-quality trainings for information and referral professionals.

Helping Clients Become Successful Self-Advocates

This training is for case managers, 211/ I & R professionals, advocates, and other social service providers who assist clients with resource referrals, support services, advocacy, and navigating the many bureaucracies that provide services. The goal of the training is to provide human service professionals with some effective and simple tools to empower the people they serve. Successfully learning to advocate for oneself instills self-confidence, and increases one's ability to move ahead towards personal and professional goals. Strong self-advocacy skills are one of the most powerful life skill sets we can assist our clients in developing.
